Basse-Terre Sud - Vieux-Habitants

VOIR INFORMATIONS

Embouchure de la Grande Rivière des Vieux-Habitants (AAMG)

A hike along the coast featuring varied landscapes, great views over the mountains and a chance to see a whole host of birds near the wetlands that are the scene for this attractive trail.

A seaside hike with the chance to see a wide range of birds, typical coastal vegetation and to visit some more original sites, such as the old coconut orchard.

Useful information

Practice : Walking

Duration : 1 h 30

Length : 2.4 km

Trek ascent : 7 m

Difficulty : Easy

Type : Cross

Themes : Coastline and cliff, Pond and wetland

Trek

Departure : Boulevard des Habissois Souverains, in the town of Vieux-Habitants (after the cemetery)

Arrival : Behind the stadium before the River de Beaugendre (Chemin de Navarraine, just before the Maison du Parc)

Markings : 🚶 Coastal trail — PR (short hike network)

Cities : 1. Vieux-Habitants

Altimetric profile

Min elevation 0 m Max elevation 4 m

From the first few yards of the trail, you have to cross one of the arms of the Grande Rivière in Vieux-Habitants (point 1). But this first crossing is problem-free, since this is not the main arm of the river. After making your way past the houses built in the middle of the river, you reach the coast, where you have to cross the main arm of the Grande Rivière (point 2). Don't hesitate to go upriver a little to find a spot where the current is less strong, because the waters can be impressive near the river mouth (if the current is too strong, retrace your steps).

After that, there are no real difficulties. You just need to walk along the coast. You pass by the Etang beach, cross the Bel Air gully (point 3), then the old coconut orchard before arriving behind the football stadium, just before the Pointe Beaugendre.

On your path...

-  Portia tree (A)
-  View over the lake (C)

-  Former coconut orchard (B)
-  Ford - Birds (D)

All useful information

Advices

1.5 litres of water per person, enclosed shoes, hat, suncream and a snack. Please note, the trail involves crossing several rivers. Be careful in bad weather. If the current is too strong, turn back.

In this natural setting, you should be particularly careful and alert, since Guadeloupe is subject to natural risks. It is vital to act in a responsible way, so that everyone can enjoy the hike!

Please note: unsupervised car parks and swimming.

How to come ?

Transports

Le conseil régional assure le réseau de transport interurbain avec des lignes de bus qui desservent tout l'archipel, par secteur géographique.

Voir : <https://www.regionguadeloupe.fr/les-actions-regionales/transport-interurbain/#>

On your path...

✿ Portia tree (A)

A very common tree on the Guadeloupe coast, often mistaken for the dangerous manchineel tree (see below)... but very different in the shape of its leaves, which are a pretty heart shape! It has beautiful flowers which turn from yellow to pink at different stages of its life. The fruit is ribbed, green and then brown, and floats in the sea. The scientific name is [*Thespesia populnea*](#).

Attribution : AAMG

✿ Former coconut orchard (B)

This former coconut orchard with 4000 trees was planted during the First World War to make soap. A panel explains the history of the plantation and the production process.

Attribution : AAMG

🌊 View over the lake (C)

A green viewpoint over the lake, located between the sea and the mountains. There are a lot of common moorhens, as well as the smaller and more discreet pied-billed grebes. Much of the lake is covered by water lettuce, [*Pistia stratiotes*](#). The plant floats at the surface and reproduces quickly by vegetative reproduction, using runners at the end of which new little plants grow.

Attribution : AAMG

🌊 Ford - Birds (D)

Be careful here: the current is sometimes quite strong. Don't hesitate to go slightly upstream of the river to find a crossing point where the current is less strong. This is also a chance to see the birds that are often present, including the green heron and egrets.
