AdVICES

Don't touch the crops without asking for permission. The fields are farmed, even if this is not obvious at all times of year.

Always stay alert, you might come across mountain bikers, joggers, etc.

In this natural setting, you should be particularly careful and alert, since Guadeloupe is subject to natural risks. It is vital to act in a responsible way, so that everyone can enjoy the hike!

Please note: unsupervised car parks.

On your path...

Avocado pear (A)

Persea americana, the avocado pear, is a fruit tree native to tropical America. The avocado is a very nutritious fruit and easy to digest. Whether eating the fruit directly or in the form of a herbal infusion, there are countless health benefits to enjoying avocados.

Viewpoint (B)

Several views over Le Petit Cul-de-Sac Marin from this spot.

✿ Kapok tree (F)

The fruits of the kapok tree contain a kind of white fluff, also known as kapok.

In Guadeloupe, unlike in other regions and countries, the kapok tree has a very mysterious aspect that has made it the theme of superstitious beliefs. Many legends are associated with it, involving "soucougnans" (vampires) and ghosts. The tree is also linked to the period of slavery, since uncooperative slaves were hanged from the branches.
