

Gaschet path

Grande-Terre Nord - Port-Louis

Sentier de Gaschet (France-Antilles)

The Gaschet dam has a unique landscape in the archipelago with a water area of 100 hectares. Bird lovers have counted 80 species, making this a unique site in the Lesser Antilles, especially for migrating ducks. It is also an easily accessible spot for anyone looking for "nature and a change of scene".

A wide-open, rustic site, ideal for getting away from it all.

Useful information

Practice : Walking

Duration : 30 min

Length : 1.7 km

Trek ascent : 11 m

Difficulty : Very easy

Type : Return trip

Themes : Agricultural landscape, Discovery trail, Pond and wetland, Relaxation area

Trek

Water hyacinths (B)

The water hyacinth (*Eichhornia crassipes*) is an aquatic plant listed as one of the worst invasive species by the International Union for Conservation of Nature (IUCN). Its proliferation is a potential source of environmental, economic, social and even health hazards in the environments where it forms colonies.
