

Ravine Paradis waterfall

Basse-Terre Sud - Vieux-Habitants

Cascade de la Ravine Paradis (PNG)

Set in the fertile valley of the Grande Rivière, this place lends itself perfectly to a contemplative and refreshing break.

Useful information

Practice: Walking

Duration: 1 h

Length: 5.1 km

Trek ascent: 134 m

Difficulty: Easy

Type: Return trip

Themes : Agricultural landscape, River and waterfall, The Slave

Route

Trek

Departure : Valley of la Grande Rivière,

Vieux-Habitants

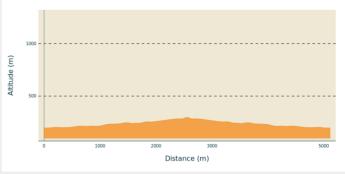

Arrival: Valley of la Grande Rivière,

Vieux-Habitants

Markings: — PR (short hike network)

Cities: 1. Vieux-Habitants

Altimetric profile

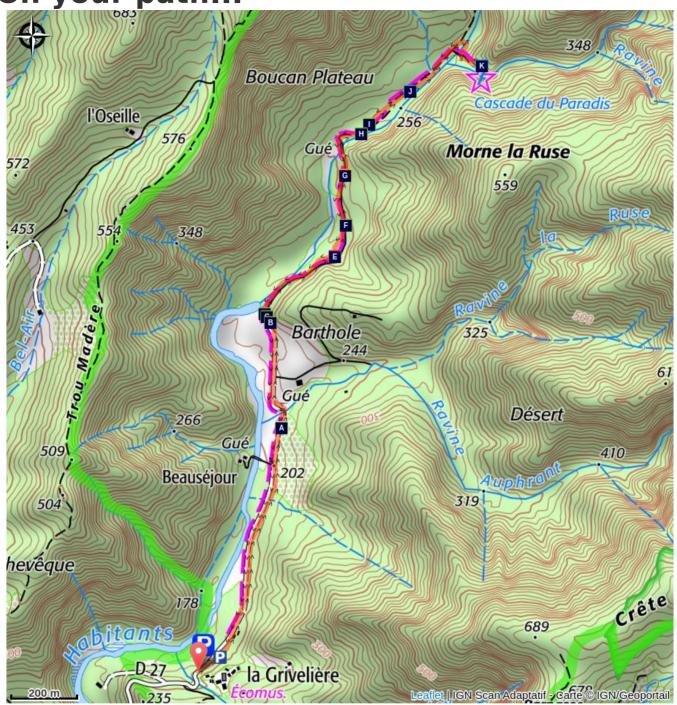

Min elevation 197 m Max elevation 297 m

Hiking trail colour: yellow

Take the old paved road. It heads through the valley, right through the heart of the farms which are mostly no longer operational. Cross the small river and keep going. Follows signs for "Trois Crêtes", turning right. Then cross the ford, which is used for water catchment. On the opposite bank, take the trail heading right. Keep going straight on at the intersection towards "Ravine Paradis" (signposted). Walk along the river for a while. A large rock marks where you will need to cross the river. It is not very easy to notice. For reference, there is a red dot on the rock on the other side of the bank, and the relatively wide path that you follow until then thereafter narrows out into a smaller one. Once you have reached the other side of the bank, cross the river on the slippery rocks to the right and then turn left onto a small path which runs alongside a separate river bank ("Ravine Paradis"). You will reach the waterfall and a small pool shortly. Take a moment to enjoy the location and then head back. Follow the same path to return to the original parking area.

You can also pay a visit to the La Grivelière house (see opening hours).

On your path...

- The Creole garden (A)
- Black-eyed Susan vine (C)
- Crête du Morne Soldat (E)
- River access (G)
- Ochroma pyramidale (I)
- Ravine Paradis waterfall (K)

- Pachystachys spicata (B)
- Acnistus arborescens (D)
- * "Rat's tail" (F)
- Pool with resplendent colours (J)

All useful information

1 Is in the midst of the park

The national park is an unrestricted natural area but subjected to regulations which must be known by all visitors.

A Advices

Warning: this route can be hazardous when the river is flooded. Do not cross the ford if heavy rain is forecast.

As Guadeloupe is prone to natural risks, extra care should be taken in this natural environment. For the benefit of all hikers, responsible behaviour is very important. Please note: the parking and swimming areas are not supervised.

How to come?

Access

GPS coordinates of the start point: Lat: 16,07271 N - Long: 61,72853 W.

At Vieux-Habitants, go in the direction of "La Grivelière" in the Valley of la Grande Rivière. Keep going until the end of the RD27 and stop at the parking area for "La Grivelière".

Advised parking

Parking for "La Grivelière"

On your path...

The Creole garden (A)

The path is bordered by farms, some of which have now fallen into disuse. Here you can see plant species that testify to human presence here, fruit trees such as mango and lemon trees, as well as banana and coconut trees.

"Do not be deceived by the overgrowth, which does not allow you to distinguish the individual plants. This Creole garden is not so much the fruit of fantasy as a work of science which understands the needs of light and shade: the fruit trees protect vanilla, bananas, soap wood, wild cherry, while the cocoa trees filter the light for the coffee bushes". Jacqueline Picard, "Parc national de la Guadeloupe", 1999.

Pachystachys spicata (B)

Pachystachys spicata is member of the Acanthaceae family. It is an ornamental flower.

Black-eyed Susan vine (C)

Thunbergia alata is a creeping plant also known as the Blackeyed Susan vine because of its purplish-black centre. Its petals are yellow or white.

Attribution : Emilie Savy / PNG

🏶 Acnistus arborescens (D)

Acnistus arborescens is a member of the Solanaceae family. It is recognisable for its large clusters of white flowers, which turn into clusters of red fruits.

Crête du Morne Soldat (E)

Fine views of the Morne Soldat ridge.

Attribution : Emilie Savy / PNG

■ "Rat's tail" (F)

This name refers to a number of species in the Piperaceae family.

As shrubs or small evergreen trees (ranging from 2-7 metres tall) with black, wart-like bark, rat's tails are a favourite among bats.

Attribution : Emilie Savy / PNG

River access (G)

Access to the Grande Rivière de Vieux-Habitants.

Bamboo (H)

A member of the Poaceae family, bamboo is more closely related to grasses than to trees. Made up of a woody, hollow stalk, its stem grows extremely quickly. It is both a highly resistant and invasive species in Guadeloupe and concerted efforts are being made to put it to best use in crafts and construction.

Attribution : PNG

Ochroma pyramidale (I)

Ochroma pyramidale, a member of the Bombacoideae subfamily. A very distinctive tree of the Grande Rivière valley, its fruits form tufts of fuzz (kapok), which were once used for pillows.

Attribution : PNG

■ Pool with resplendent colours (J)

On the ravine just before the waterfall, the pool is a very pleasant spot for a nice quiet swim.

Attribution : Emilie Savy / PNG

■ Ravine Paradis waterfall (K)

The site of the Ravine Paradis waterfall: a haven of peace, where you can enjoy the cool and the beautiful reflections on the water of the shimmering morning light.
