

Access to La Citerne refuge

Basse-Terre Sud - Capesterre-Belle-Eau

Abri de La Citerne (PNG)

A walk combining a taste for effort and a wonderful landscape, with a view over one of the Carbet Falls and at the end, if the weather permits, a panorama over Capesterre, Le Petit Cul-de-Sac Marin and Grande-Terre.

This is the last section of the first stage of the GR-G1 trail, and the effort required will be well rewarded.

Useful information

Practice : Walking

Duration : 1 h 30

Length : 1.2 km

Trek ascent : 258 m

Difficulty : Medium

Type : Cross

Themes : Mountain shelter

Trek

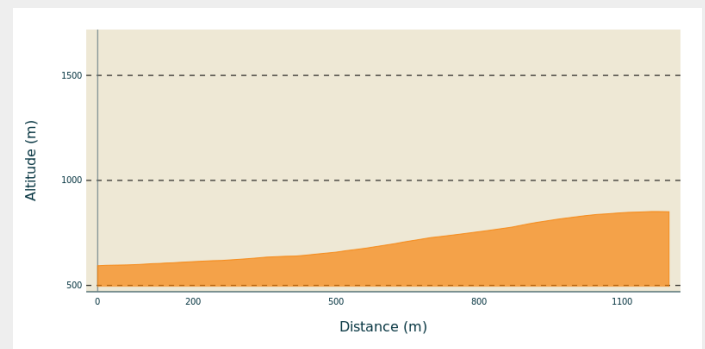

Departure : Carbet Falls visitors' area

Arrival : La Citerne refuge

Markings :  GR (long hike network)  PR (short hike network)

Cities : 1. Capesterre-Belle-Eau

Altimetric profile

Min elevation 594 m Max elevation 852 m

Few markings.

At the Chutes du Carbet car park, follow the hiking trail to the first intersection (point 1) about 150m along the trail.

Then take the path to the left and begin the climb, passing through the 2 small gullies. Enjoy the view from the Carbet Falls without going too near the edge.

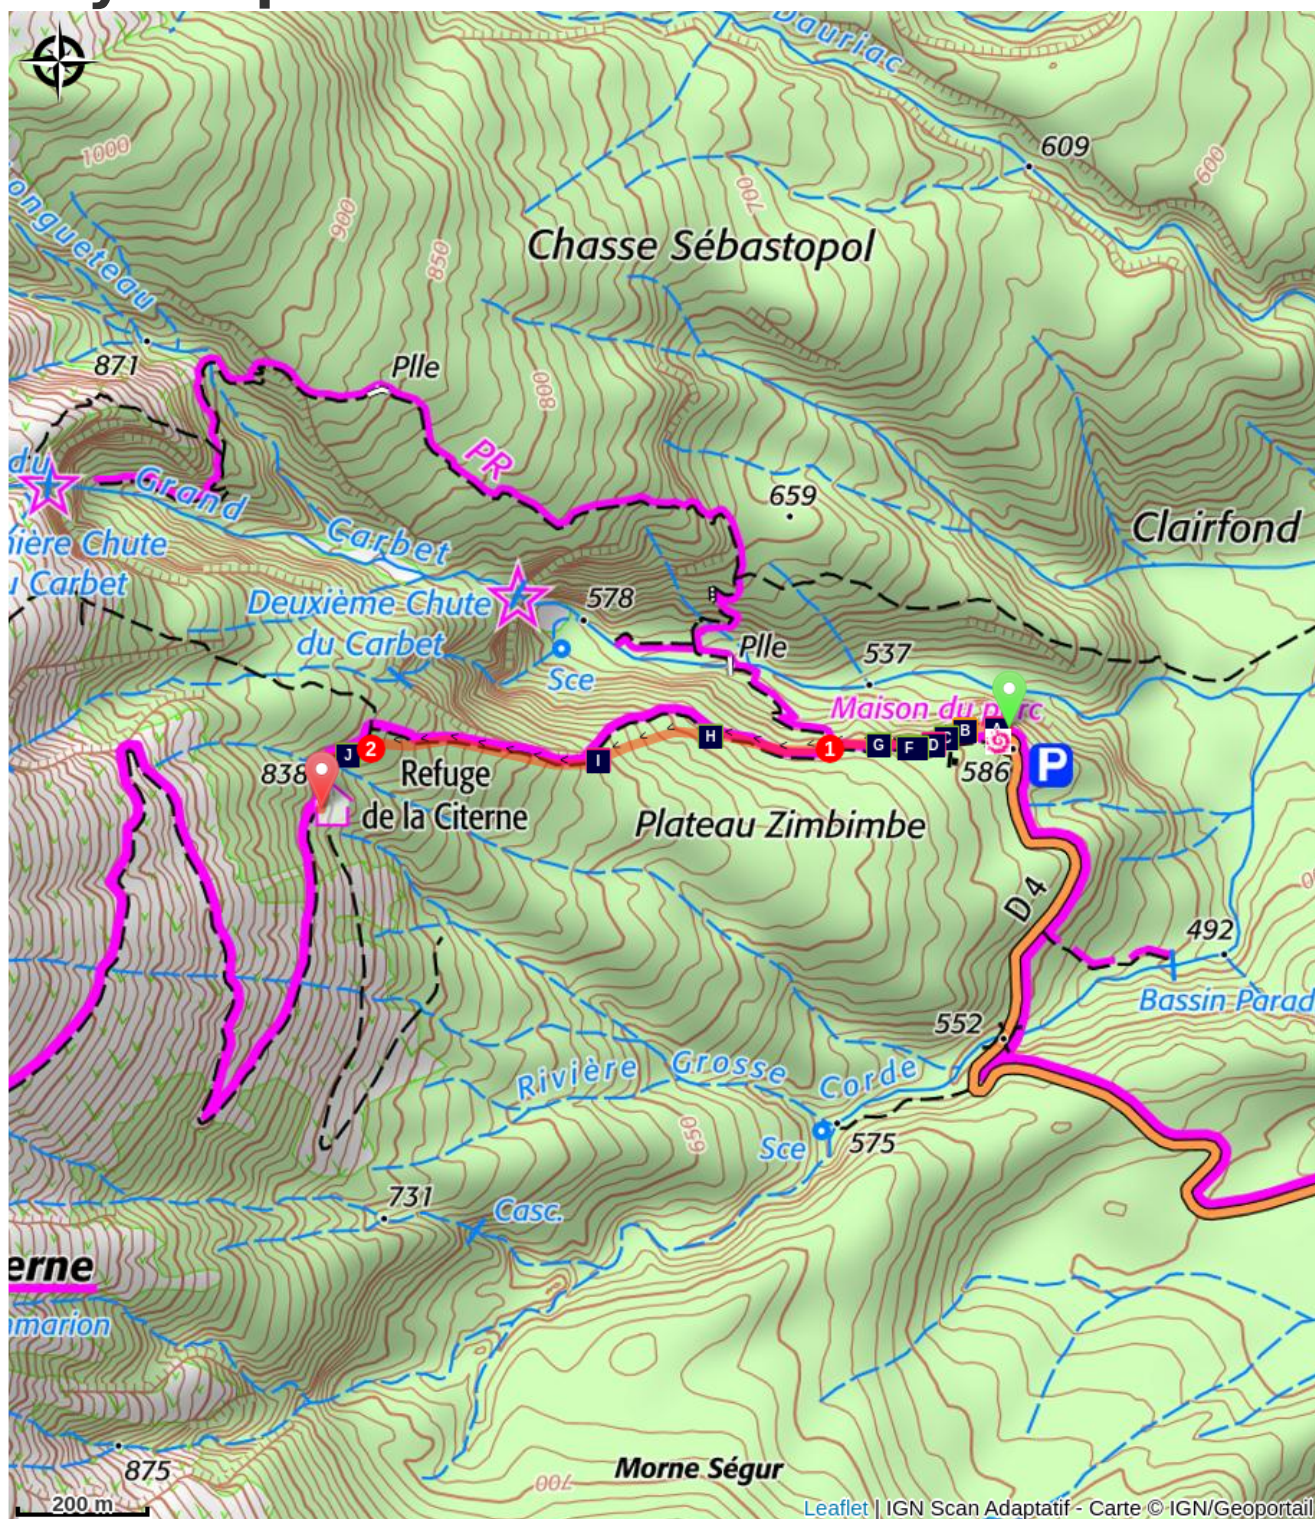

Continue up to the intersection (point 2) and then turn left, pass the river if it is not flooded.

After about 100m, you will arrive at the refuge.

It is possible to spend the night here.

The winding road leading to "L'Echelle" is still closed (due to a rock slide in April 2020).

All useful information

Is in the midst of the park

The national park is an unrestricted natural area but subjected to regulations which must be known by all visitors.

Advices

Access to the refuge is open. But the winding road leading to "L'Echelle" is still closed (due to a rock slide in April 2020).

Don't set off after 3 pm. Night falls very quickly at some times of the year.

It is recommended to be physically fit.

Ask a mountain guide to go with you.

NB: unsupervised car park.

How to come ?

Access

GPS starting point: Lat: 16.04200°N - Long: 61.63812°W.

In Capesterre-Belle-Eau, on the RN1 road, head for Saint-Sauveur. Then take the RD4 road towards L'Habituée. Follow this road to the end, the Carbet Falls visitors' area.

Advised parking

Carbet Falls visitors' area.

Information desks

Reception area of Les Chutes du Carbet

terminus de la RD4 , route de l'Habituée,
97130 Capesterre-Belle-Eau

On your path...

Promontory, extensive views (A)

Accessible to persons with reduced mobility, on a clear day this promontory offers a panorama of la Grande-Terre (Petit Cul-sac marin), Marie-Galante and la Désirade. The information boards explain the geological formation of the waterfalls.

Attribution : PNG

Picnic area (B)

A small path leads to the toilets and a special picnic area.

Attribution : PNG

Roseleaf bramble (C)

A member of the Rosaceae family, *Rubus rosifolius* is a hygrophilous species (i.e. one that needs moisture) which thrives in moderate shade: its white flowers and red fruits need the sun to grow. It is found up to 1,500 metres above sea level, where it colonises the banks of forest paths, invades the undergrowth of tropical forest and forms dense thickets. Its fruits are especially popular among birds.

✿ Psychotria aubletiane (E)

Psychotria aubletiane, also known as Ipeka bata, belongs to the Rubiaceae family. It is a wetland shrub with upright branches. It features elliptical leaves, white axillary flowers and fruits in small drupes that turn bright blue.

✿ "Rat's tail" (F)

This name refers to a number of species in the Piperaceae family.

As shrubs or small evergreen trees (ranging from 2-7 metres tall) with black, wart-like bark, rat's tails are a favourite among bats.

✿ Balisiers (G)

A member of the Musaceae family, *Heliconia caribaea* is a large grass that is typical of the Lesser Antilles tropical rainforest. A member of the same family as the banana trees, the plant can grow up to 5 m high. It features an inflorescence that resembles a red ear or red ear with yellow trim, or sometimes completely yellow. Its flowers are visible all year round, most notably between April and June.

✿ Candlewood (H)

The candlewood is a majestic tree in our forests. It can grow to a height of 30m. It was once used by the Kalinagos (native Americans) to make boats known as "kanawa". The white sap is used in magical-religious rituals today and is also popular during the carnival with the "Groupes à Peau" ("Skin Groups") known as "MAS".

📖 View over the 2nd waterfall (I)

Very fine view over the 2nd Carbet Fall.

Attribution : AAMG

"Elephant's Ear" (J)

More often called Taro, it is both saxicolous (living on rocks) and epiphytic (using other plants for support).
