# Trek

**Departure** : Anse Canot beach

**Arrival** : Anse Canot beach

**Markings** : 🌳 Coastal trail — PR (short hike network)

**Cities** : 1. Saint-Louis

## Altimetric profile

Min elevation 1 m Max elevation 141 m

Pass behind the cabin at the edge of the beach (Point 1) and continue along the shady trail which crosses the Pointe du Mays, then continues along a canefield. Reach the D205; fork right and go along Moustique beach as far as the Pointe du Cimetière.

Take the trail on the left, beside the Frais, and reach a fork in the path.

Follow the trail on the right along the coastline and passing through the agaves (Point 2).

Come to a ravine and ascend it, in the shade of the trees. Leaving the Trou Massacre on the right, take a grassy path on the left across pastures to rejoin the road; follow it to the left for 100 m.

Turn right at the bend on a stony path (Point 3). At the fork, take the path on the left which climbs through shrubs. Reach the summit, on a grazing area (in clear weather, viewpoint over the whole of Guadeloupe). Continue to the Merlet road; walk along it (metalled path) for 600 m (viewpoint over Anse Vieux Fort and its islet). Carry on, taking a grassy path to the right (Point 4). At the quarry, follow the path on the left which descends slightly and joins the D205. Turn right for 250 m.

Turn left (Point 5) on a grassy path leading toward the mangroves of Vieux Fort (note the red mangrove with their stilt roots and the dragonsblood trees with their wide buttress roots; but be careful as this is a flood zone). At the end, cross a road, then go to the left along the Vieux Fort beach, for 150 m. Behind the small building at the foot of the hill, take the trail which mounts to the Point Fleur d'Epée, then goes back down to the Anse Canot.
